BILAL AHMAD

Skills

BACK END DEVELOPMENT | NodeJS * Express

FRONT END DEVELOPMENT | ReactJS * Javascript * Typescript * Bootstrap * TailwindCSS * HTML * CSS

Mobile App Development | React Native

DataBase | MongoDB * SQL * FireBase

Projects

- **Uber**

Created an app like Uber in react-native, nodejs, express and firebase people could choose a pickup location and drop off location using map marker or google place autocomplete. They can also view their live location as well as driver's location within 2km radius. Customers can make ride request and book a ride. Drivers are provided an option of using in app maps real-time navigation or they can use the google maps provided through linking.

- **Tap n Hire** (Final Year Project)

Mobile application where customers can look for service providers for a task to be performed. Made using React native, React Typescript, NodeJs, Express, MongoDB, Flask. KYC functionality is implemented, Push Notifications. Web-app is made using React typescript. Real Time Chat using socket.io is also implemented.

- **Yelp Camp**

A web application made using MVC architecture in nodejs and express. Users can register themselves and upload a campground with its images and details. The location of the campground can also be viewed on map using a service called mapbox.
